11-12_Duet_AAS_Thompson-Flowers.mp3

METADATA & ID3 TAGS

We ask that file names be checked at the metadata level using the following instructions:

Metadata (also known as ID3 tags for MP3 files) is information (such as title, artist, album, genre etc.) that is stored inside the song file.

This is often different from the name of the file itself. In order to avoid confusion at the competition music table, we ask coaches to ensure that the title of the song file, and the ID3 tag title of the song file are the same.

For instructions on changing ID3 tags, [click here](#) for Windows and [click here](#) for iTunes.
